

# FTP transfer

You can set up an FTP access (File Transfer Protocol), for example for start lists or result lists etc. under **Setup/Program options/FTP-Transfer**. This function is fully automatic for the DGV intranet, Swissgolfnetwork and [PC CADDIE://online](http://www.pccaddie.com).

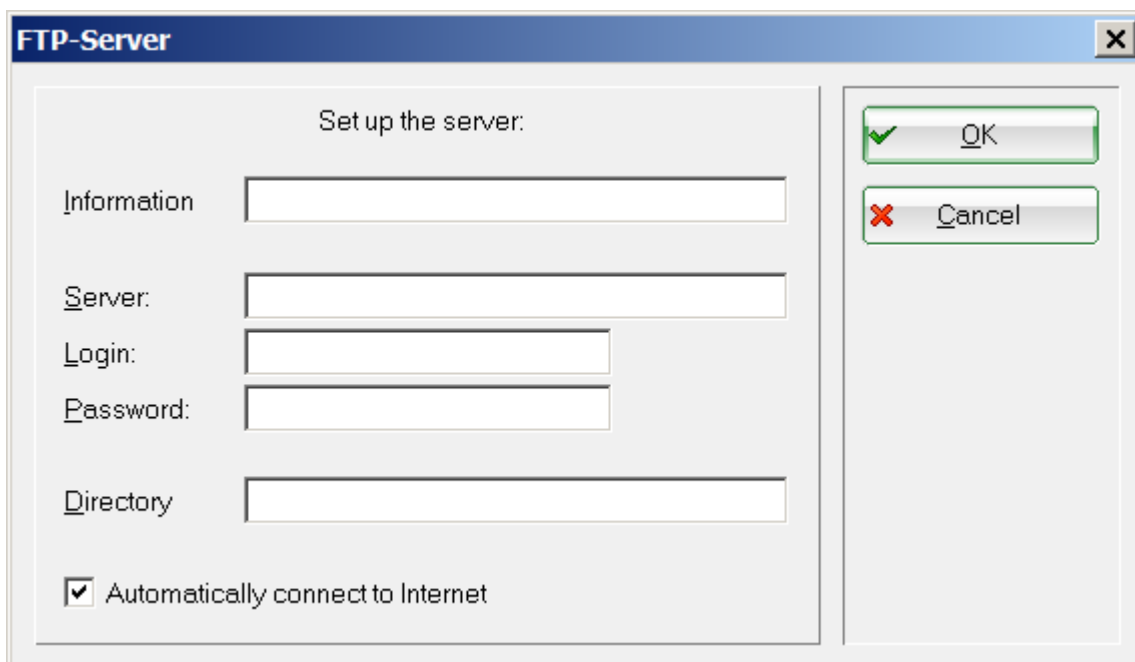

1. Here you can see already configured FTP accesses.
2. Create a new access under **New**.
3. Modify an already existing access with **Edit**.
4. Use **Delete** to remove an access.

Never delete the existing FTP accesses.

The following window opens after you set up a new access:

Fill in the fields according to your specifications. In addition, the data can be sent to a server and positioned correctly.
