

CRM in the person mask

If you open a person, the Person's Appointment window, which is used to store all information such as invoices, reminders, letters, emails etc. directly with this person, appears to the right of the main window. The big advantage is that you can save a lot of paper and space and put all the information bundled together with this person. Also record changes can be tracked, so that you know exactly who changed what for each person. Therefore, the password management makes sense, so you also see which employee has made changes regarding a customer. You can also create additional contacts.

The screenshot displays two windows from a CRM application. The left window, titled 'Person: Tester, Timo', contains a form for entering personal data. It includes fields for Name, Search abbr., No., Title, First name, and Name. Below these are tabs for 'Status', '1st Addr.', '2nd Addr.', 'payment', 'Infos', and 'Memo'. The 'Status' tab is active, showing fields for Exact HCP, Homeclub, Homeclub-ID, Gender, Age group, Membership, Status, Unused, Additional info, D.O.B., Entry, and Resigned. The right window, titled 'Info: 6', shows a list of events with columns for date, time, and description. The events are: 27.04.18 14:23 PROJ Complaint, 27.04.18 14:32 PROJ Birthday party, 27.04.18 14:39 TODO Request a quote, 27.04.18 14:49 OPIN Invoice 20180427, 27.04.18 15:09 PROJCL Opening tournament, and 27.04.18 15:18 PROJCL Basic course. The 'Info: 6' window has a tabbed interface with tabs for memo, todo, contact person, Contact, general overview, correspondence, E-Mail, Changes to the data, and Search.
