Define timetable views (Views)

From PC CADDIE version Business Edition 2022a, the function is available under **System/Timetable/Define timetable views (Views)** can be found. You can see screenshots =>here

You can access this function by going to the main menu **Define timetable/timetable views** in the main menu. You can also simply press the **V** button if you have opened the timetable and it is active:

All areas a alle Bereiche X 18 Loch Platz g 18holes & Carts x Mitarbeiter m Terminal b	ruch
alle Bereiche 18 Loch Platz g 18 holes & Carts x Mitarbeiter m Terminal b	ruch
18 Loch Platz g 18 holes & Carts x Mitarbeiter m Terminal b	
18holes & Carts x Mitarbeiter m Terminal	
Mitarbeiter m Terminal	
Terminal b	
Hotel 7 Tage	
noter rage II	
Cart bat

Zoom factor must be set to 0.25 so that the online icons are visible (for those who have booked online)

2					
•	Which	areas	should	be	visible?

These and other questions can be answered very easily with the views. The views allow the various PC CADDIE users in your club to customise the timetable design and thus work quickly in the timetable. Click on **New** (F9) to open a new view:

Timetable-View	
Bezeichnung: 18holes & Carts	✓ <u>S</u> peichern
Bereiche Konfiguration Anzeige	Abbruch
Enthaltene Bereiche	Appruch
18 Loch	
Cart all	
Hinzufügen F3 Bearbeiten F7 Entfernen F5	
▶ <u>H</u> öher ▶ <u>T</u> iefer	

For example, would you like to see all vehicles in the timetable at the same time?

We will show you how to do this below: First enter a suitable *designation* for the view, for example "Vehicles".

TIP When creating a new timetable area, it can also be assigned directly to a view. Read more about this under Edit areas.

Areas

Now determine which areas you want to make visible in the timetable. Click on New (F9) to add a new area:

Area View		×
<u>B</u> ooking area: Offset days: Offset time:	18 Holes	✓ <u>□</u> K ズ <u>C</u> ancel
<u>H</u> eader: <u>T</u> ime factor: <u>A</u> rea width:	Always show time splitting Area 1,000 250 Pixel	

- The offset entries for the days and time move the range in the overall view by this period
- If the tick is set for the time division, the column with the time is not only displayed on the far left but before each column (this helps if the areas have different "from" times).
- To fix the width of the column for the 18-hole course, enter the desired width. This means that the width of all other columns will be adjusted to the available space.
- In our example, all carts belong to the CARTALL book group. As we want to display all carts, we add the entire group to our view, which saves a lot of work. Confirm with Enter or **OK**.

Edit area	×
Search abbr.: C1 Sorting: Name: Cart 1 Option B Option C Cancellation Views Publish General settings Information Booking Follow-up booking Option A Grid: Start: 8 h	✓ <u>OK</u> ★ <u>C</u> ancel
End: 18 h Spacing: 10 min	
Standard period: 5 h Maximum: 1 People	
Number of holes: Course abbr.(A/B/C): TE	
Status: C-Wahl Booking groups: CARTALL Set.	
Address record:	

Repeat the procedure for all the areas you require. With the button *Edit* (F7) button to edit an existing area, with *Delete* (F5) you can delete the individual areas again. With the buttons *Up* and

Lower buttons can be used to change the order in which the areas are displayed in the view.

Configuration

Bezeichnung:	8holes & Carts				✓ <u>S</u> peichern
Bereiche	Konfiguration		Anzeige		Abbruch
Schnell-Taste: x Kopfzeile:			um	•	× Appruch
Zoomfaktor der Zei	t-Achse:	4 Ze	ilen pro Buchung	Ŧ	
Anzahl Blöcke (Tage) in der Ansicht:	5.000			
Sehr spezielle Einst	ellungen:				
Tagesabstand von Block zu Block:			Tage		
Breite zusätzlicher Trenn-Balken:			Pixel		
Breite der Zeitsp	alte: '		Pixel		
Höhe der View-K	opfzeile:		Pixel		
Höhe der Bereic	ns-Kopfzeile:		Pixel		
Block: Breite:	Pixel Höhe:		Pixel		

Under **Quick key** you can enter any key. Please select a meaningful key here and, above all, one that has not yet been used (see Working quickly in the timetable). In future, you will then use this button to jump directly to your newly defined view in the timetable.

Header	Date means that the date appears in the header. Define the timetable view with the various factors according to your needs.
Zoom factor	Specify here how the individual bookings should be arranged (one below the other, two and two next to each other, all next to each other, etc.).
Number of blocks (days) in the view	Define here how many days you would like to have displayed next to each other in this view. The more days you display, the narrower the individual columns in the view will be.
Very special Settings	Detailed adjustments to the layout of the view are made here.

Display

Timetable view			×
<u>N</u> ame:	Vehicles		✓ <u>0</u> K
Areas	Configuration	View	
Colour:	16776960	6	<u>X</u> <u>C</u> ancel
Show in termin	al		
Terminal area:	Tee time	• I	
Terminal ID:			

Below **Display** you can select a colour and determine whether the view should also be displayed in the terminal.

Areas that are to be displayed in the terminal must be defined in a timetable view.
