

Select account area

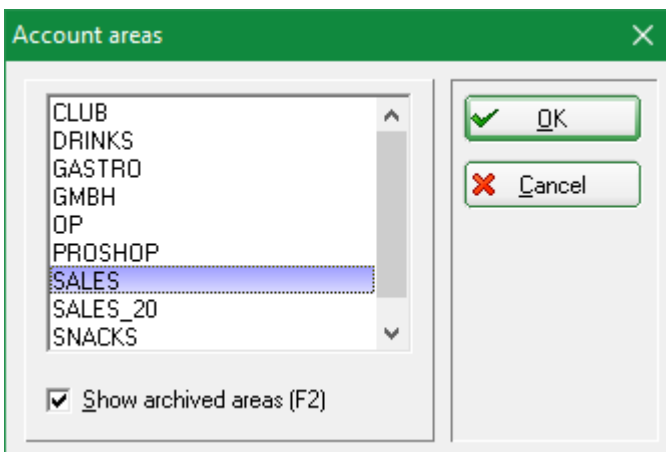

You can change the account category via **Accounts/Select account area** or with the key combination CTRL+F2 or by clicking on the yellow box which shows the current account area.

In our example we are working in the accounting area **SALES**.

You can now select the required area. To view the archive areas, tick off **Show archive areas** or hit F2.

You can set at each station which areas can be viewed: [Database path](#)

Using the password management you can set individual access rights for the account areas: [Password management](#)
